Introduction to WaterPIC

- **Why We Need a WaterPIC**
 - Released: November, 2005
- **Background**
 - PUR, surface water monitoring, TMDLs
- **WaterPIC Demonstration**
- **Potential Study Areas**

The Problem: In A Nutshell

STATE OF CALIFORNIA
DEPARTMENT OF PESTICIDE REGULATION
PRLD 001-004, 2005

PESTICIDE USE REPORT

County	Station	Treatment	Target	Block	Field	Map	Product/Program/Operator	Applicator Name
		<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>		
Operator ID/Phone No.		Site Identification Number		TYPE/USE		APPLICATOR		
				AGRIC		P APPLICATOR		
Location		Advertiser/Tractor		Contractor/Tractor				
GPS Number	GPS/Cell	Registration No.	Year Label	Year Product Used	Rate			
					<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Problems: Using Available Data Sets

- Very large
- Scattered: not under one roof
- Different formats
- Idiosyncratic data
- Specialized software and skills to do spatial analysis required
- **TIME CONSUMING!!!!**

Background: PUR

STATE OF CALIFORNIA
DEPARTMENT OF PESTICIDE REGULATION
PR-ENF-025 (REV. 2/99)

PESTICIDE USE REPORT

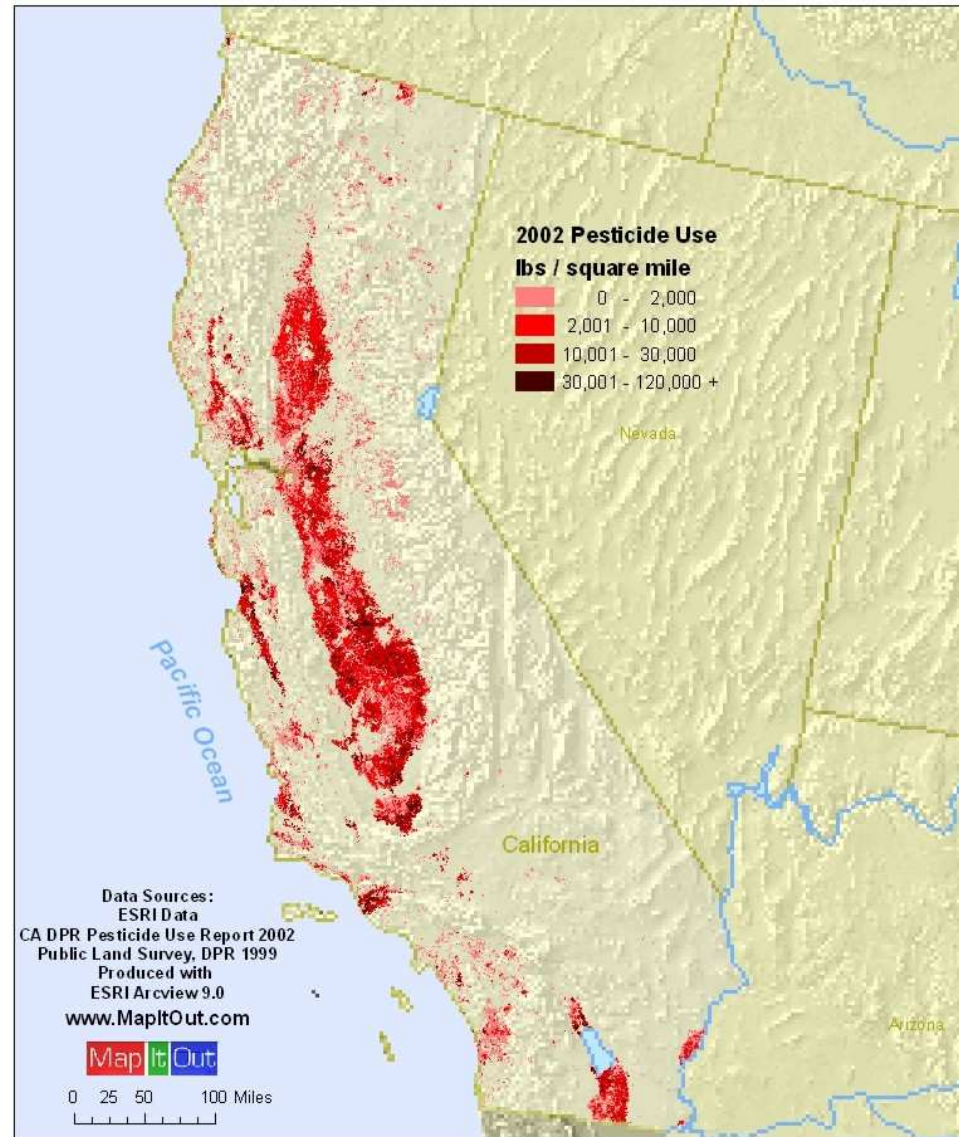

Nursery

County No.	Section	Township <input type="checkbox"/> N <input type="checkbox"/> S	Range <input type="checkbox"/> E <input type="checkbox"/> W	Base & Meridian S M H <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	App. Method Air <input type="checkbox"/> Ground <input type="checkbox"/> Other <input type="checkbox"/>	Permitter/Property Operator	Applicator Name
Operator ID/Permit No.				Site Identification Number		Total Planted Acres/Units

Chem No.	Manufacturer/Name of Product Applied			EPA/Calif. Registration No. From Label	Total Product Used	Rate	

Reported Agricultural Pesticide Use in California, 2002

Total Pounds of Active Ingredient Applied per Square Mile

USEPA Region 9: Percent of Impaired Waters, 1998

Background: Major Pollutants in California

1. Sediments
2. Nutrients
3. Pathogens
- 4. Pesticides**
5. Toxics: Inorganics (Metals)
6. Toxics: Organics
7. Mercury

Background: USGS Monitoring Data

Background: Department of Pesticide Regulation (DPR) Monitoring Data

Background: Total Maximum Daily Loads (TMDL)

- Address non-point source pollution such as agricultural pesticide runoff
- Set limits on pesticide concentrations that show up in water from a given watershed
- Will result in regulation of pesticide runoff
- WaterPIC designed to help in the process

WaterPIC Objectives

- Harmonize datasets under one roof
- Accelerate analysis of pesticides impacts on the environment including use trends
- Facilitate a greater understanding of relationships between pesticide use and environmental impacts in water
- Create an easy to use and easy to understand tool for regulators, scientists, watershed groups, and the general public

Hypothetical Users

- Molly the Policy Maker
 - Regulators, legislators, policy analysts
- Brad the Mad Scientist
 - Scientists and researchers at academic institutions, regulatory agencies, etc.
- John Q. Public
 - The general public, growers, public interest groups, etc.

WaterPIC Datasets

- DPR Pesticide Use Reporting (PUR) data
- Surface water quality monitoring data
 - USGS
 - DPR
- Geospatial information
 - RWQCB TMDL watershed delineations
 - CalWater 2.2.1 watershed delineations
 - USGS HUC watersheds delineations
 - PUR's modified Public Land Survey (PLS)
- Aquatic toxicity
 - EPA AQUIRE data

Welcome to the WaterPIC

The Water & Pesticides Information Center (WaterPIC) provides information about the relationships between reported, agricultural pesticide use in California and measured surface water concentrations in the environment. Follow the steps below to study this relationship over the area and time of interest.

Step 1 of 5: Please select a regional watershed from the map or click a link below:

[Central Coast](#) [Colorado River](#) [East Sacramento River](#) [North Coast](#) [North Lahontan](#) [San Francisco Bay](#) [San Joaquin](#) [South Coast](#) [South Lahontan](#) [Tulare Lake](#) [West Sacramento River](#)

Search by one of the following watershed delineations:

- Calwater defined
- RWQCB defined TMDL
- USGS defined hydrologic unit code (HUC)

Your selections so far:

1. **Watershed:** Not specified
2. **Study Area:** Not specified
3. **Time Period:** Not specified
4. **Pesticide:** Not specified

Help files regarding:

[Step 1 Watersheds and other geographic information](#)

Step 2 of 5: Select a Calwater watershed:

Hydrologic Unit [map](#)

Hydrologic Area [map](#)

 Select Hydrologic Area
 Butte Basin
 Glenn Colusa
 Sutter Bypass
 Sycamore-Sutter
 Select Hydrologic Subarea First

Hydrologic Planning Watershed

Your selections so far:

1. **Watershed:** West Sacramento River
2. **Study Area:** Not specified
3. **Time Period:** Not specified
4. **Pesticide:** Not specified

West Sacramento River Watershed

Size: 8,072,752 acres (32,669 km²)

Total pounds of pesticides active ingredients used in the West Sacramento River Watershed in 2003:
 17,382,472 lbs (7,901,124 kg)
 (more pesticide use information at www.pesticideinfo.org)

California Regional Water Quality Control Boards:

Central Valley Sacramento Main Office - [Region 5](#)
 11020 Sun Center Drive #200
 Rancho Cordova, California 95670-6114
 Phone: (916) 464-3291
 Fax: (916) 464-4645

Central Valley RWQCB Redding Branch Office - [Region 5](#)
 415 Knollcrest Drive, Suite 100
 Redding, California 96002
 Phone: (530) 224-4845
 Fax: (530) 224-4857

Help files regarding:
[Step 2](#)
[Calwater watersheds](#)

Pesticide use and other agricultural information for counties in the West Sacramento River Watershed:

Step 2 of 5: Select a RWQCB-defined TMDL watershed:

RWQCB defined TMDL Watershed

Select a TMDL watershed

- Select a TMDL watershed
- American River
- Butte Sutter Basin
- Colusa Drain
- Feather River
- Natomas Cross Canal Area
- Sacramento River Above Colusa**

Your selections so far:

1. **Watershed:** West Sacramento River
2. **Study Area:** Not specified
3. **Time Period:** Not specified
4. **Pesticide:** Not specified

Sacramento River Watershed

Size: ~3,322,000 acres (~13,440 km²)

Total pounds of pesticides active ingredients used in the West Sacramento River Watershed in 2003:
12,559,768 lbs (5,697,015 kg)
(more pesticide use information at www.pesticideinfo.org)

California Regional Water Quality Control Boards:
Central Valley Sacramento Main Office - [Region 5](#)
11020 Sun Center Drive #200
Rancho Cordova, California 95670-6114
Phone: (916) 464-3291
Fax: (916) 464-4645

Central Valley RWQCB Redding Branch Office - [Region 5](#)
415 Knollcrest Drive, Suite 100
Redding, California 96002
Phone: (530) 224-4845
Fax: (530) 224-4857

Help files regarding:

- [Step 2](#)
- [RWQCB defined TMDL watersheds](#)

Pesticide use and other agricultural information for counties in the West Sacramento River Watershed:

- | | | | |
|------------------------|----------------------------|---------------------------|------------------------|
| Butte | Colusa | El Dorado | Glenn |
| Placer | Sacramento | Shasta | Sutter |
| Tehama | Yolo | Yuba | |

Step 2 of 5: Select a USGS defined HUC watershed:

USGS defined HUC Watershed

Submit

Your selections so far:

- 1. **Watershed:** West Sacramento River
- 2. **Study Area:** Not specified
- 3. **Time Period:** Not specified
- 4. **Pesticide:** Not specified

Dimethoate - Identification, toxicity, use, water pollution potential, ecological toxicity and regulatory information

Note: See [Working with the Information on this Page](#) section below for important notes about this data.

Chemical ID	Identifying information, including synonyms, ID numbers, use type, chemical classification, a link to a list of all products containing this chemical and a list of the top crops this pesticide is used on in California.
Poisoning Symptoms	Signs and symptoms of poisoning, first aid, and links to treatment information for this chemical.
Toxicity	Toxicity to humans, including carcinogenicity, reproductive and developmental toxicity, neurotoxicity, and acute toxicity.
Regulatory	Links to world-wide registration status as well as regulatory information for the U.S. and California.
Water	Water quality standards and physical properties affecting water contamination potential.
Ecotoxicity	Toxicity to aquatic organisms.
Related Chems	List of chemicals in the same family, including breakdown products, salts, esters, isomers, and other derivatives.

Chemical Identification and Use for Dimethoate

[Top](#) ↑

Basic Identification Information About This Chemical

Chemical Name:	Dimethoate
CAS Number:	60-51-5
U.S. EPA PC Code:	035001
CA DPR Chem Code:	216
Molecular Weight:	229.2800
Molecular Structure:	

PAN Pesticides Database

Home

[Help](#) | [Feedback](#) | [Take the Survey](#)

The PAN Pesticides Database is your one-stop location for current toxicity and regulatory information for pesticides. To find out more about insecticides, herbicides and other pesticides select one of the choices below. To learn more about our comprehensive collection of data sources see [About the Data](#). This resource is a project of [Pesticide Action Network North America](#).

 April 8, 2005: Version 6.0 of PesticideInfo is now live and ready to serve you. Most data sets have been updated and some new features added. Check out [What's New!](#)

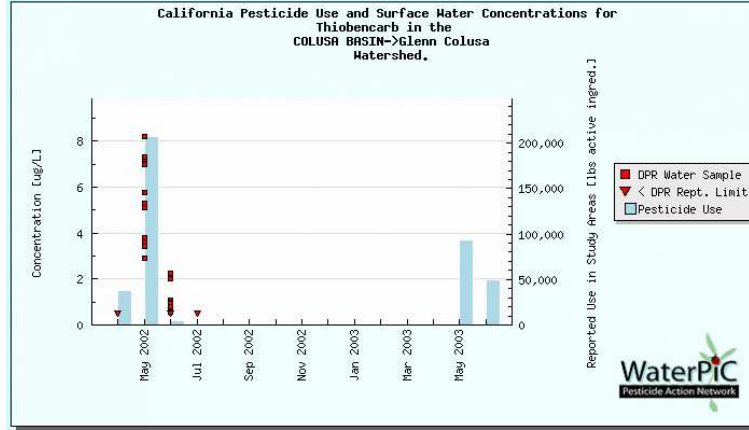

- [Help Getting Started](#)
- [Chemical Search](#) or [Alphabetized Chemical List](#)
- [Product Search](#)
- [Pesticide Poisoning Diagnostic Tool](#)
- [International Pesticide Registration](#)
- [Aquatic Ecotoxicity](#)
- [California Pesticide Use](#)
- [Water & Pesticides Information Center \(Beta\)](#)
- [Pesticide Tutorial and Reference](#)
- [Least/Non-Toxic Alternatives](#)
- [Links to Other Resources](#)
- [Get Active!](#)

This project made possible by our [Sponsors](#). We need your support. Please consider [making a donation today](#).

NOTE! · While all care has been taken to ensure that the information in the PAN Pesticide Database is as accurate as possible at the time of preparation, Pesticide Action Network and its funders take no responsibility for any errors or omissions in the original data sources or for data sources that may have changed since incorporation into the database. The information in this database does not in any way replace or supersede the information on the pesticide product labeling or other regulatory

Step 5 of 5: View your results:

Your selections so far:
1. Watershed: West Sacramento River
2. Study Area: COLUSA BASIN->Glenn Colusa
3. Time Period: January 1, 2002 to December 31, 2003
4. Pesticide: Thiobencarb

[Integrator Monitoring Sites](#)

Notes:

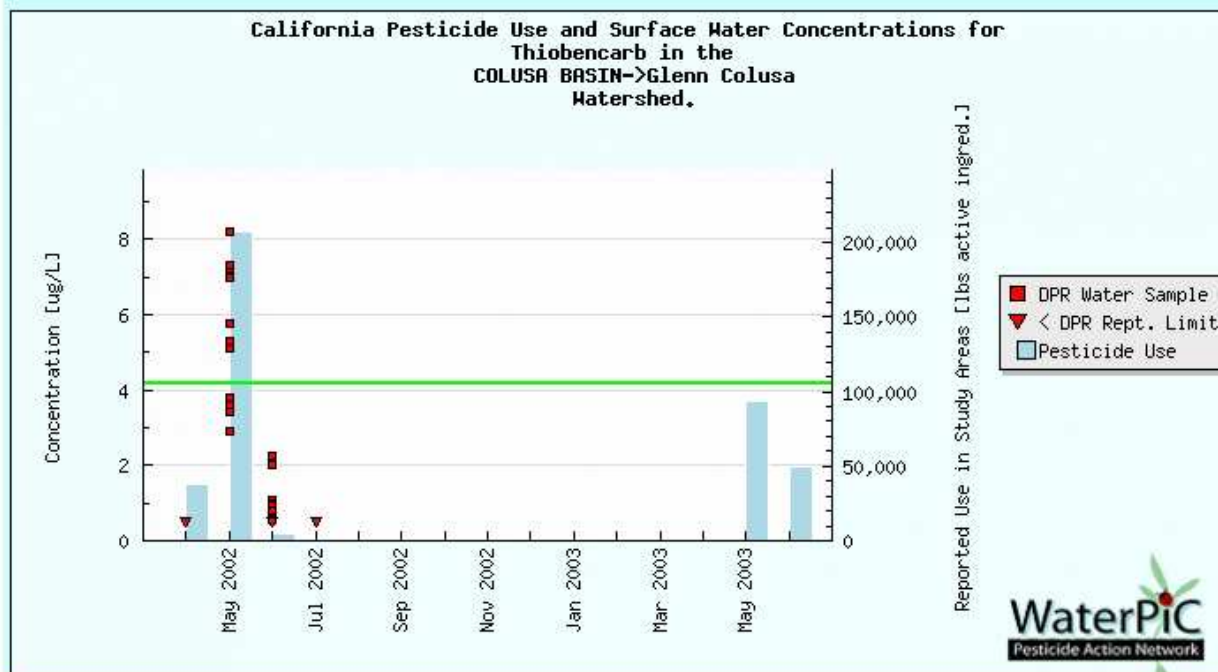

- For an explanation of what data is included in this graph please see the WaterPIC [plotting help files](#)
- Please keep in mind that points (squares and triangles) shown above may represent more than one surface water sample.
- [Urban pesticide uses](#) are not included in the WaterPIC
- Rept. Limit = Reporting limit cited by study authors above which analytes were not detected. This number is typically the lowest concentration detectable for a given analyte, analytical method, and analyst.

Replot the graph above using the following water quality criteria:

*(Link to PANNA's Aquire database)

Organism group	Species Common Name	Species Latin Name*	Average LC50 or LC50 Concentration Range	Number of Studies
<input type="checkbox"/> Molluscs	Common bay mussel, blue mussel	Mytilus edulis	3.0	1
<input checked="" type="checkbox"/> Molluscs	Clam	Corbicula leana	4.2	1

WaterPIC Potential Uses

- Development of water monitoring programs
- First approximation correlation tool
- Provide temporal trend analysis
- Facilitate TMDL development
- Help growers evaluate BMPs (Ag Waiver)
- Find data gaps

WaterPIC Uses: In A Nutshell

STATE OF CALIFORNIA

WaterPIC Summary

- PANNA recognized a need for a Water & Pesticides Information Center
- The WaterPIC integrates pesticide use, monitoring, and toxicity data in one site
- Fast, free, easy to use from any internet connection
- Can be used to study temporal and spatial correlations between pesticide applications and environmental impacts
- Answers all your pesticide questions can be found at www.pesticideinfo.org
